

BUILDING CODES HAVE MET THEIR MATCH

# OUTPERFORM SPRAY FOAM WITH A VERIFIABLE, LOW-COST SOLUTION

FROM OWENS CORNING AND AEROBARRIER®

SEE INSIDE TO LEARN  
HOW THIS EXCITING  
TECHNOLOGY WORKS

**AEROBARRIER®**  
Breakthrough Envelope Sealing Technology

Owens Corning and AeroBarrier® Technology have come together to offer a system combining the proven performance of PINK® Fiberglas™ Insulation with a revolutionary new sealing technology that outperforms spray foam and gets you to your desired ACH (Air Changes per Hour) faster and more efficiently.

# GUARANTEED AIR SEALING AND PROVEN INSULATION SOLUTIONS

AeroBarrier® Technology is a single-component, aerosol-applied sealant that performs as an air barrier around ceilings, walls, floors, doors, windows, electrical and plumbing fixtures.

1

Install PINK® Fiberglas™ Batt or Blown-in Insulation to local code requirements. Complete drywall installation and first mud application.\*

2

- A Tape any designed openings such as open vents or exposed plumbing pipes.
- B Protect any finished horizontal surfaces such as wood floors.

3

Use the computer-controlled atomization system to pressurize the space and spray. Sealant particles automatically seek out and find air gaps and holes up to ½" in size.

## 5 STEPS TO A HIGH PERFORMANCE HOME

\* AeroBarrier® can be applied before insulation as long as exterior building shell can be pressurized.

† Estimate based on average 2,600 sq. ft. home

## WHY IT'S BETTER

### FAST & EASY

Typically less than 4 hours, start to finish,<sup>†</sup> in the average house. Just set up and the AeroBarrier<sup>®</sup> machine does the rest.

### GUARANTEED

ACH results are displayed in real time during application and verified on completion using industry certified blower door.

### AFFORDABLE

Meet and verify air tightness requirements in real time, avoiding guesswork and rework to save time, material and labor.

### DURABLE

Achieves durability performance in 3 key areas: flexing, aging and compatibility in tests simulating 50 years of service.

### PERFORMANCE & COMFORT

When used with PINK<sup>®</sup> Fiberglas<sup>™</sup> Insulation, helps reduce drafts, noise and heat loss.

### SEALS HARD-TO-FIND HOLES

Seals gaps up to 1/2" and as fine as a human hair.

### SAFE

GREENGUARD Gold Certified

4

before

after

5

Allow the particles to build up around any gaps and holes to seal leakage areas without coating surfaces.

Clean-up is fast and easy!

Run a final blower door test to verify the sealing results. At the end of the process, receive an AeroBarrier Certificate with a pre- and post- leakage report.

**AEROBARRIER**  
Breakthrough Envelope Sealing Technology

Utilizing a proven technology developed by University of California, Davis, AeroBarrier<sup>®</sup> creates a tight building envelope that maximizes the performance of Owens Corning<sup>®</sup> PINK<sup>®</sup> Fiberglas<sup>™</sup> Insulation.

## NEXT-GENERATION PERFORMANCE FOR BUILDERS

The combination of Owens Corning PINK® Fiberglas™ Insulation and AeroBarrier® lets builders dial in the precise level of performance they seek quickly and easily. The revolutionary AeroBarrier® smart technology employs a self-guided aerosol that “finds” the cracks that are often missed with surface sealing methods. This proven process typically takes 4 hours, start to finish,‡ improving cycle time. Its self-guided application system can be run after hours, saving even more time. And unlike spray foam, Owens Corning® PINK® Fiberglas™ batts and rolls can be safely installed while other trades are on site.

## NEXT-LEVEL COMFORT FOR HOMEOWNERS

Owens Corning® PINK® Fiberglas™ Batts and Blown-in Loosefill Insulation set the standard for energy efficiency and thermal performance. When they're installed in a home that's been sealed with AeroBarrier®, the comfort is sealed in, too.

## DIALED-IN PERFORMANCE WITH REAL-TIME CERTIFIED RESULTS

The AeroBarrier® system monitors ACH performance during the sealing process, giving you instantly certified results.

## CLEANER & LESS WASTE

Using Owens Corning® Insulation + AeroBarrier® combination means less waste and a cleaner jobsite.

## AEROBARRIER® TECHNOLOGY USES LESS THAN 5 GALLONS OF LOW VOC SEALANT

Instead of 150 gallons of highly reactive chemicals.‡
